# Index

**This index should be cited as:**

IPCC, 2022: Index. In: *Climate Change 2022: Impacts, Adaptation and Vulnerability*. Contribution of Working Group II to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change [H.-O. Pörtner, D.C. Roberts, M. Tignor, E.S. Poloczanska, K. Mintenbeck, A. Alegría, M. Craig, S. Langsdorf, S. Löschke, V. Möller, A. Okem, B. Rama (eds.)]. Cambridge University Press, Cambridge, UK and New York, NY, USA, pp. 3005–3056, doi:10.1017/9781009325844.033.

**Note:** \* indicates the term also appears in the Glossary (Annex II). Bold page numbers indicate page spans for entire chapters. Italicized page numbers denote tables, figures and boxed material.

## A

**Abrupt change\***, 442–445, 445, 2416, 2457, 2661  
responses to, 438

**Abrupt ecosystem shifts**, 442–445, 445

**Acacia trees**, 301

**Acclimatisation\***, 381, 407–409

**Accumulation (bioaccumulation)\***, 49, 64, 382, 462, 789

**Action**. See Climate action

**Active ownership**, 2710

**Adaptation\***, 134, 2428–2441, 2600–2614

about, 8–9, 22, 43

about: definition, 136

about: summary, 22–30, 71–99

acclimatisation\* and, 407–409

adaptation-maladaptation continuum, 2600–2602, 2603

adaptation-related responses, 71, 2415, 2420, 2428–2441

adaptation-related responses: not all reducing risk, 2431, 2440–2441

adaptation-related responses: responses vs. impacts, 2431, 2441

adequacy of, 2431, 2434–2436

autonomous\*, 284–285

barriers to, 84, 970, 978–980, 978, 1193, 2444

behavioural aspects, 1460, 1516–1519, 1517, 2433–2434, 2434

benefits of, 22, 2552–2553, 2553

bioeconomy and, 828–831

climate resilience, 1295

community-based\*, 26, 91, 666–667, 808, 1246–1247

complexity of, 1228

context-sensitive, 23

contextual nature of, 2600

continuum of, 2600–2602, 2603

costs, 652–653, 1183, 1289

Cross-Chapter Box: ADAPT, 168–171

Cross-Chapter Box: PALEO, 154–157

current adaptation, 22–23, 71–84

decision making framework for, 22

decision-making framework for, 176–177, 307

definition of, 43

delay, consequences of, 1585, 1586, 1587, 1634, 1643, 1651, 1652, 1931, 1982

ecosystem-based (EbA)\* (See Ecosystem-based adaptation)

effective, characteristics of, 162–163

effectiveness of, 558, 635–654, 2415, 2432, 2434–2435

effectiveness of, temperature and, 35, 87

enabling and catalysing conditions, 29–30, 97–98

enabling conditions, 29–30, 95, 126, 163–168, 484, 963–982, 1228–1238, 1231, 2546–2547, 2580–2600

ethics and, 162–163, 656–657

evolutionary\*, 386, 407–409, 408

facilitating, 173–178

feasibility, 23–28, 24–26, 312–317, 313, 2733, 2769–2807

flexibility and, 29

gender and SDG5, 1174, 2703–2704

goals of, 41–43, 162, 179

governance and, 35, 71, 126, 166–168, 2581–2584, 2583

implementation (See Adaptation implementation)

importance of, 125, 129–132

incremental (See Incremental adaptation)

Indigenous knowledge in, 157–158

individuals and households, 2433, 2433

inequalities potentially worsened by, 2657

innovations in, 93, 101, 820–821

integrated, 23, 99, 106, 108, 2577

inter-regional climate risks, 2443–2444

- Frequently Asked Questions (FAQs)**
  - 1.1 | What are the goals of climate change adaptation?, 179
  - 1.2 | Is climate change adaptation urgent?, 180
  - 1.3 | What constitutes successful adaptation to climate change?, 180–181
  - 1.4 | What is transformational adaptation?, 181
  - 2.1 | Will species become extinct with climate change and is there anything we can do to prevent this?, 221–222
  - 2.2 | How does climate change increase the risk of diseases?, 233–235
  - 2.3 | Is climate change increasing wildfire?, 247–248
  - 2.4 | How does nature benefit human health and well-being and how does climate change affect this?, 282–283
  - 2.5 | How can we reduce the risks of climate change to people by protecting and managing nature better?, 310–312
  - 2.6 | Can tree planting tackle climate change?, 315–316
  - 3.1 | How do we know which changes to marine ecosystems are specifically caused by climate change?, 387–388
  - 3.2 | How are marine heatwaves affecting marine life and human communities?, 416–417
  - 3.3 | Are we approaching so-called tipping points in the ocean and what can we do about it?, 447–448
  - 3.4 | Which industries and jobs are most vulnerable to the impacts of climate change in the oceans?, 469–471
  - 3.5 | How can nature-based solutions, including marine protected areas, help us to adapt to climate-driven changes in the oceans?, 486–487
  - 4.1 | What is water security, and how will climate change affect it?, 660
  - 4.2 | Which places are becoming wetter and which are becoming drier, and what risks do these bring to people?, 661–662
  - 4.3 | How will climate change impact the severity of water-related disasters, such as droughts and floods?, 662–663
  - 4.4 | Globally, agriculture is the largest user of water. How will climate change impact this sector, and how can farmers adapt to these changes?, 664–666
  - 4.5 | Which principles can communities implement to sustainably adapt to the ways that climate change is impacting their water security?, 666–667
  - 5.1 | How is climate change (already) affecting people's ability to have enough nutritious food?, 832–833
  - 5.2 | How will climate change impact food availability by mid and late century and who will suffer most?, 834
  - 5.3 | Land is going to be an important resource for mitigating climate change: how is the increasing competition for land threatening global food security and who will be affected the most?, 835–836
  - 5.4 | What are effective adaptation strategies for improving food security in a warming world?, 836–837
  - 5.5 | Climate change is not the only factor threatening global food security: other than climate action, what other actions are needed to end hunger and ensure access by all people to nutritious and sufficient food all year round?, 837–838
  - 6.1 | Why and How Are Cities, Settlements and Different Types of Infrastructure Especially Vulnerable to the Impacts of Climate Change?, 992
  - 6.2 | What Are the Key Climate Risks Faced by Cities, Settlements and Vulnerable Populations Today, and How Will These

- Risks Change in a Mid-Century (2050) 2°C Warmer World?, 993
- 6.3 | What Adaptation Actions in Human Settlements Can Contribute to Reducing Climate Risks and Building Resilience across Building, Neighbourhood, City and Global Scales?, 994
- 6.4 | How Can Actions That Reduce Climate Risks in Cities and Settlements Also Help to Reduce Urban Poverty, Enhance Economic Performance and Contribute to Climate Mitigation?, 995
- 6.5 | What Policy Tools, Governance Strategies and Financing Arrangements Can Enable More Inclusive and Effective Climate Adaptation in Cities and Settlements?, 996
- 7.1 | How will climate change affect physical and mental health and well-being?, 1126–1127
- 7.2 | Will climate change lead to wide-scale forced migration and involuntary displacement?, 1128
- 7.3 | Will climate change increase the potential for violent conflict?, 1128
- 7.4 | What solutions can effectively reduce climate change risks to health, well-being, forced migration and conflict?, 1128–1129
- 7.5 | What are some specific examples of actions taken in other sectors that reduce climate change risks in the health sector?, 1129
- 8.1 | Why are people who are poor and disadvantaged especially vulnerable to climate change and why do climate change impacts worsen inequality?, 1251
- 8.2 | Which world regions are highly vulnerable and how many people live there?, 1251–1252
- 8.3 | How does and will climate change interact with other global trends (e.g., urbanisation, economic globalisation) and shocks (e.g., COVID-19) to influence livelihoods of the poor?, 1252
- 8.4 | What can be done to help reduce the risks from climate change, especially for the poor?, 1253
- 8.5 | How do present adaptation and future responses to climate change affect poverty and inequality?, 1253
- 9.1 | Which climate hazards impact African livelihoods, economies, health and well-being the most?, 1399–1400
- 9.2 | What are the limits and benefits of climate change adaptation in Africa?, 1401
- 9.3 | How can African countries secure enough food in changing climate conditions for their growing populations?, 1401
- 9.4 | How can African local knowledge serve climate adaptation planning more effectively?, 1402
- 10.1 | What are the current and projected key risks related to climate change in each sub-region of Asia?, 1532–1533
- 10.2 | What are the current and emerging adaptation options across Asia?, 1534–1535
- 10.3 | How are Indigenous knowledge and local knowledge being incorporated in the design and implementation of adaptation projects and policies in Asia?, 1535–1536
- 10.4 | How can Asia meet multiple goals of climate change adaptation and sustainable development within the coming decades?, 1536–1537
- 11.1 | How is climate change affecting Australia and New Zealand?, 1648
- 11.2 | What systems in Australia and New Zealand are most at risk from ongoing climate change?, 1648–1649
- 11.3 | How can Indigenous Peoples' knowledge and practice help us understand contemporary climate impacts and inform adaptation in Australia and New Zealand?, 1650
- 11.4, How can Australia and New Zealand adapt to climate change?, 1650–1651
- 12.1 | How are inequality and poverty limiting options to adapt to climate change in Central and South America?, 1765–1766
- 12.2 | How have urban areas in Central and South America adapted to climate change so far, which further actions should be considered within the next decades and what are the limits of adaptation and sustainability?, 1766–1767
- 12.3 | How do climatic events and conditions affect migration and displacement in Central and South America, will this change due to climate change, and how can communities adapt?, 1767–1768
- 12.4 | How is climate change impacting and how is it expected to impact food production in Central and South America in the next 30 years, and what effective adaptation strategies are and can be adopted in the region?, 1768–1769
- 12.5 | How can Indigenous knowledge and practices contribute to adaptation initiatives in Central and South America?, 1770
- 13.1 | How can climate change affect social inequality in Europe?, 1889
- 13.2 | What are the limits of adaptation for ecosystems in Europe?, 1890
- 13.3 | How can people adapt at individual and community level to heatwaves in Europe?, 1891
- 13.4 | What opportunities does climate change generate for human and natural systems in Europe?, 1892
- 14.1 | How has climate change contributed to recent extreme events in North America and their impacts?, 1938–1939
- 14.2 | What can we learn from the North American past about adapting to climate change?, 1986–1988
- 14.3 | What impacts do changes in the North American Arctic have within and outside the region?, 1988
- 14.4 | What are some effective strategies for adapting to climate change that have been implemented across North America, and are there limits to our ability to adapt successfully to future change?, 1998–1999
- 15.1 | How is climate change affecting nature and human life on small islands, and will further climate change result in some small islands becoming uninhabitable for humans in the near future?, 2095–2096
- 15.2 | How have some small island communities already adapted to climate change?, 2096–2099
- 15.3 | How will climate-related changes affect the contributions of agriculture and fisheries to food security in small islands?, 2099–2100
- 16.1 | What are key risks in relation to climate change?, 2502–2503
- 16.2 | How does adaptation help to manage key risks and what are its limits?, 2504
- 16.3 | How do climate scientists differentiate between impacts of climate change and changes in natural or human systems that occur for other reasons?, 2505
- 16.4 | What adaptation-related responses to climate change have already been observed, and do they help reduce climate risk?, 2506
- 16.5 | How does climate risk vary with temperature?, 2506–2507
- 16.6 | What is the role of extreme weather events in the risks we face from climate change?, 2508
- 17.1 | Which guidelines, instruments and resources are available for decision makers to recognise climate risks and decide on the best course of action, 2616
- 17.2 | What financing options are available to support adaptation and climate resilience?, 2617–2618
- 17.3 | Why is adaptation planning along a spectrum from incremental to transformational adaptation important in a warming world?, 2619
- 17.4 | Given the existing state of adaptation, and the remaining risks that are not being managed, who bears the burden of these residual risks around the world?, 2619
- 17.5 | How do we know whether adaptation is successful?, 2620–2621
- 18.1 | What is a climate resilient development pathway?, 2734
- 18.2 | What is climate resilient development and how can climate change adaptation (measures) contribute to achieving this?, 2734–2735

- 18.3 | How can different actors across society and levels of government be empowered to pursue climate resilient development?, 2736
- 18.4 | What role do transitions and transformations in energy, urban and infrastructure, industrial, land and ocean ecosystems, and in society, play in climate resilient development?, 2736
- 18.5 | What are success criteria in climate resilient development and how can actors satisfy those criteria?, 2737
- CCP1.1 | Why are biodiversity hotspots important?, 2151
- CCP1.2 | How can society ensure conservation of biodiversity in climate policies?, 2152
- CCP2.1 | Why are coastal cities and settlements by the sea especially at risk in a changing climate, and which cities are most at risk?, 2182
- CCP2.2 | What actions can be taken by coastal cities and settlements to reduce climate change risk?, 2183
- CCP2.3 | Considering the wide-ranging and interconnected climate and development challenges coastal cities and settlements face, how can more climate resilient development pathways be enabled?, 2184
- CCP3.1 | How has climate change already affected drylands and why are they so vulnerable?, 2217
- CCP3.2 | How will climate change impact the world's drylands and their people?, 2217–2218
- CCP3.3 | What can be done to support sustainable development in desert and semiarid areas, given projected climate changes?, 2218
- CCP4.1 | Is the Mediterranean Basin a 'climate change hotspot'?, 2253–2254
- CCP4.2 | Can Mediterranean countries adapt to sea level rise?, 2255–2256
- CCP4.3 | What is the link between climate change and human migration in the Mediterranean Basin?, 2256
- CCP5.1 | How is freshwater from mountain regions affected by climate change, and what are the consequences for people and ecosystems?, 2300
- CCP5.2 | Do people in mountain regions, and further downstream, face more severe risks to water-related disasters due to climate change, and how are they coping?, 2301
- CCP5.3 | Does climate change pose a risk to mountain species and ecosystems, and will this affect people?, 2302
- CCP5.4 | What types of adaptation options are feasible to address the impacts of climate change in mountain regions under different levels of warming and what are their limits?, 2303
- CCP5.5 | Why are regional cooperation and transboundary governance needed for sustainable mountain development?, 2304
- CCP6.1 | How Do Changes in Ecosystems and Human Systems in the Polar Regions Impact Everyone around the Globe? How Will Changes in Polar Fisheries Impact Food Security and Nutrition around the World?, 2333
- CCP6.2 | Is Sea Ice Reduction in the Polar Regions Driving an Increase in Shipping Traffic?, 2336–2337
- CCP6.3 | How Have Arctic Communities Adapted to Environmental Change in the Past and Will These Experiences Help Them Respond Now and in the Future?, 2339
- CCP6.4 | When Will Climate Change Impacts in Polar Regions Surpass Our Ability to Adapt?, 2351
