

# INTERGOVERNMENTAL PANEL ON CLIMATE CHANGE

INTERGOVERNMENTAL PANEL ON CLIMATE CHANGE

IPCC-XXIV/Doc. 4 (14.VII.2005)

TWENTY-FOURTH SESSION Montreal, 26-28 September 2005

Agenda item: 3 ENGLISH ONLY

IPCC PROGRAMME AND BUDGET FOR 2006 TO 2008

(Submitted by the Secretariat)

E-mail: IPCC-Sec@wmo.int

Website: http://www.ipcc.ch

#### THE IPCC TRUST FUND PROGRAMME AND BUDGET

## **INTRODUCTION**

- 1. The budget presented in this document relates to the IPCC Trust Fund only. It should be noted that there are other resources available to the IPCC, notably support services provided by WMO and UNEP, generous contributions by the governments of Japan, the Netherlands, the United Kingdom and the United States of America which are supporting Technical Support Units (TSUs), website support provided by TERI (India) and support from all those governments and organizations which host IPCC meetings and make experts available to the IPCC.
- 2. This budget document contains two parts. Part A presents statements and analysis of income and expenditures of the IPCC Trust Fund for the period 1 January 2004 to 30 June 2005. Part B deals with expenditure plans (draft budgets) through the end of 2008.
- 3. On 9 May 2005 the Secretary has sent fund raising letters to Governments. As requested by the Panel the statement of expenditure for the IPCC Trust Fund as at 31 December 2004 and the statement of contributions to the IPCC Trust Fund as at 31 December 2004 were attached to these letters.

#### **Part A - INCOME AND EXPENDITURE**

# Annual rate of voluntary cash contributions

4. The Panel requested to update and present the annual rate of voluntary cash contributions to the IPCC Trust Fund since its inception. The information is provided in **Table 1**. **Table 2** provides information on contributions received in 2005 up to 30 June. It should be noted that the contributions to the IPCC Trust Fund over recent years (not including funds reserved for special purposes) have been around CHF 4M to 5M per annum, but for the forthcoming period of the Fourth Assessment, the average requirements are expected to be more than CHF 6M per annum. It also needs to be noted that in recent years annual contributions were around or slightly above annual expenditures. However, annual contributions did not reach the level of the annual budget approved by the Panel. It is hoped that governments will build into their annual budgets a regular contribution that aggregates to meet the increased budgetary requirements.

# Overall cash flow

5. The IPCC entered 2004 with a carry over of CHF 8,222,864 (see **Table 3**) and through 2004 spent slightly less, including 2003 obligations, than was received from contributions, to emerge with a carryover into 2004 of CHF 9,656,339.

## **Expenditures**

- 6. As requested by the Panel the Secretariat has reviewed past expenditures for 2004 and the first six months of 2005 (**Tables 4 and 5**).
- 7. **Table 4** provides a listing of expense items giving the amount allocated to each one, the actual expenditures and budget under-(over) spent.
- 8. In 2004 there has been a consistent under-expenditure of funds for meetings, except for the Expert Meeting on Industrial Technology Development and Transfer. The savings were due to a variety of reasons, including generous support from the host country India for IPCC-22, support by the respective host countries for other meetings, holding meetings back to back with other events, careful planning of travel arrangements and "no-shows" at meetings.

- 9. There was an over expenditure on publications and outreach. The main reason for over expenditure on outreach was that mailing of publications by our contractor SMI is now accounted for under outreach and no longer under "IPCC Secretariat" as was in the past. Further, due to continued demand it was considered necessary to purchase additional copies of the IPCC TAR for free distribution to developing country experts
- 10. An item that is not covered by the IPCC budget is travel for the IPCC Chair on behalf of the IPCC to non-IPCC meetings. Travel by the IPCC Chair to IPCC meetings is normally accounted for under the respective meeting. The Panel may wish to introduce a new budget item to provide for travel by the IPCC Chair.
- 11. Expenditures in the first half of the financial year 2005 are presented in **Table 5**. They are within the expected range. Over expenditures relate to past year commitments and one expert meeting held in 2005.

## **PART B: DRAFT BUDGETS**

- 12. The financial procedures require that the budget presented to the Panel consists of a proposed budget for the next year, a forecast budget for the second year and an indicative budget for the third year. This has been done, with Tables 6 through 8 giving projected expenditure for the years 2006 through 2008 respectively. The draft budgets are based on requirements submitted by TSUs and identified by the IPCC Secretariat.
- 13. Some key assumptions relating to the IPCC's work programme that are built into the budget are:
  - a) The number of journeys for lead authors has been adjusted according to information provided by the TSUs.
  - b) The third lead authors meeting for the WG 2 contribution to the AR4 has been moved from 2005 to 2006. The number of total journeys has been adjusted according to information provided by the TSU.
  - c) Two expert meetings were inserted in 2006 and one in 2007 following recommendations from the IPCC expert meeting on aerosols and from the IPCC workshop on new emission scenarios.
  - d) Following a recommendation from the TFB budgetary provisions for software development for the 2006 Guidelines and for a scoping meeting on future tasks of the NGGIP were made in 2006 and 2007.
  - e) Following a meeting convened by the IPCC Chair on the management of the AR4 Synthesis Report (SYR) provisions for a part time staff member at P3/4 level are added to the budget for 2006 and 2007. It is assumed that the part-time staff member will resume duties in mid 2006 and work on average 50% but with the flexibility to work full time for the IPCC at peak times. The assumption is that this person will work with a full time TSU head of the TSU for the SYR. Indications were received that the TSU head could be seconded by a government. Depending on the local arrangements some additional secretariat and IT support may be required. Provisions were also made to allow for the development of graphics in the AR4 SYR and graphics in the WG contributions that follow the same design. Provisions were made for Writing Team Meetings, consistent with the agreed schedule.
  - f) Part of the publication and translation costs for the AR4 SYR have been shifted to 2007. The final numbers for publication and translation of all AR4 products may need adjustment later depending on print runs and contracts with the publisher.
  - g) Costs for translation and printing of the 2006 Guidelines in 2006 were increased based on updated information for the TSU.

# Intergovernmental Panel on Climate Change (IPCC) Contributions to IPCC since inception (1989) As of 31 December 2004 (Amounts in Swiss Francs)
